Test Booklet Series

## TEST BOOKLET

GENERAL STUDIES & ENGINEERING APTITUDE

(Signature of the Candidate)

(Invigilator's Signature)

Time Allowed : Two (2) hours

#### INSTRUCTIONS

- 1. PLEASE CHECK THE TEST BOOKLET DOES NOT HAVE ANY UNPRINTED OR TORN OR MISSING PAGES OR ITEMS ETC. IF SO, GET IT REPLACED BY A COMPLETE TEST BOOKLET.
- 2. ENCODE CLEARLY THE TEST BOOKLET SERIES A,B,C OR D AS THE CASE MAY BE IN THE APPROPRIATE PLACE IN THE ANSWER SHEET BY BLACK BALL POINT PEN ONLY.
- 3. This Test Booklet contains 100 items (questions). Each question has four responses (answers). You will select the responses which you want to mark on the Answer Sheet. In case you feel that there is more than one correct response, mark the response which you consider the most appropriate. In any case, choose ONLY ONE response for each item.
- 4. You have to mark all your responses ONLY on the separate Answer Sheet provided. See directions in the Answer Sheet.
- 5. All items carry equal marks.
- 6. Before you proceed to mark in the Answer Sheet the responses to various items in the Test Booklet, you have to fill in some particulars in the Answer Sheet as per instruction sent to you with your Admission Certificate.
- 7. After you have completed filling in responses on the Answer Sheet and the Examination is completed, you should handover the Answer Sheet to the Invigilator only. You are permitted to take away the Test Booklet.
- 8. Sheets for rough work are appended on the Test Booklet at the end.
- 9. Penalty for wrong answers:
  - (a) There will be four alternatives for the answer to every question. For each question for which a wrong answer has been given by the candidate, **one-fourth** of the marks assigned to that question will be deducted as penalty.
  - (b) If a candidate gives more than one answer, it will be treated as a Wrong Answer even if one of the given answers happens to be correct and there will be same penalty as above to that question.
  - (c) If a question is left blank, i.e., no answer is given by the candidate, there will be **no penalty** for that question.

DO NOT OPEN THIS TEST BOOKLET UNTIL YOU ARE ASKED TO DO SO.

Maximum Marks : 100

£

Four options are given against each of the following questions. Select the correct option from the four options and encode it in the Answer Sheet by using <u>Black Ball Point Pen</u> only as per example given below :

Example : P : Aunt Polly wanted to trap Tom —— damaging confessions.into(B) with(C) by(D) on

Example Q : Let's watch — movie; I mean 'Pather Panchali'. (A) a (B) an (C) the (D) no article is needed

PART – A

Direction for Question Nos. 1 to 4.

Choose the most appropriate preposition/article to fill in the blanks.

| 1.   | Mosquitoes breed stagnant water       | Choose the most of the shoet of   |
|------|---------------------------------------|-----------------------------------|
|      | (A) in                                | (B) on                            |
|      | (C) into                              | (D) under                         |
|      |                                       | (A) most expensive                |
| 2.   | He has a shop in the market where he  | e deals wheat.                    |
|      | (A) with                              | (B) in                            |
|      | (C) at                                | (D) of the baselo of live been of |
| 3.   | What did you do with camera, I        | l lent you?                       |
|      | (A) a                                 | (B) an observed (D)               |
|      | (C) the                               | (D) no article is neaded          |
| 1/TR | /SET/MECHANICAL/PRE/DEGREE/2023/D-225 | 5 (3) [Turn over                  |

(A) an

(c) a

4. Bring me \_\_\_\_\_ umbrella that is lying on the bed.

11.264

(B) the

(D) No article is needed

## Direction for Question Nos. 5 and 6.

Choose from the given options/words opposite in meaning to the underlined words in the following sentences :

- 5. He spares no pain to come out of this problem.
  - (A) Doubt (B) Pleasure
  - (C) Anger (D) Hesitation

6. He <u>confessed</u> that he had stolen the money.

- (A) Denied (B) Refused
- (C) Opposed

(D) Reacted

Direction for Question Nos. 7 and 8.

Choose the most appropriate Synonym for the underlined words in the sentences :

- 7. Oil is one of the <u>principal</u> sources of energy.
  - (A) most expensive (B) most important
  - (C) most difficult (D) most popular

8. The road will be closed until the <u>blizzard</u> ends.

- (A) snowstorm (B) hurricane
- (C) tornado

(D) thunderstorm

1/TR/SET/MECHANICAL/PRE/DEGREE/2023/D-225 (4)

Direction for Question Nos. 7 and 8.

GET IT ON Google Play

The underlined and lettered parts of each sentence below may contain and error in grammar, usage, words choice (diction), or expression (idiom). Read each sentence carefully and identify which item, if any, contains an error. If it contains no error, answer is D.

| 9.   | I hope you'll come         | <u>in</u> Spain          | 89g)       | soon. Sind tarkes   | No erro   | or <sup>a</sup> |
|------|----------------------------|--------------------------|------------|---------------------|-----------|-----------------|
|      | Α                          | В                        |            | С                   | D         |                 |

13. What is 'Saharsh' initiative of Tripura Government?

- (A) Education drive for sanitation workers
- (B) To encourage social and emotional learning in children
- (C) Financial help for poor
  - (D) Drive against child marriages
- 14. Which institution is a watchdog for money laundering and terror financing and issues 'Grey List'?
  - (A) WHO (B) IMF
  - (C) FATF

15. Which institution has commissioned India's first green hydrogen blending project?

(D) WTO

(B) GAIL

(D) IOL

(6)

- (A) ONGC
- (C) NTPC

16. Which State of India has become country's Fully Digital Banking according to SLBC?

(A) Kerala(B) Assam(C) Uttar Pradesh(D) Punjab

17. The Tripura Merger Agreement was signed in New Delhi on

(A) 15th October, 1949
(B) 15th August 1947
(C) 9th September, 1949
(D) 26th November 1949

1/TR/SET/MECHANICAL/PRE/DEGREE/2023/D-225

- (A) Maharaja Radhakrishore Manikya (B) Maharaja Bir Chandra Manikya
- (C) Maharaja Dhanya Manikya (D) Maharaja Birendra Kishore Manikya
- India won the Under-19 Women's T-20 World Cup Cricket Championship in January, 2023 by beating
  - (A) Pakistan

- (B) England
- (C) Australia (D) South Africa

20. Who was the Chief Guest in India's Republic Day Celebration - 2023 in New Delhi?

- (A) Prime Minister of England
- (C) Prime Minister of Nepal
- (B) President of France
- (D) President of Egypt.

- 21. For a closed system, the difference between the heat added to the system and the work done by the system is equal to
  - (A) Change in enthalpy (B) change in entropy
  - (C) change in temperature (D) change in internal energy
- 22. An inventor says that his new concept of an engine, while working between temperature limits of 27°C and 327°C rejects 45% of heat absorbed from the source. His engine is then equivalent to which one of the following engines?
  - (A) Carnot engine (B) Diesel engine
  - (C) An impossible engine (D) Ericsson engine
- 23. Air at 20°C blows over a hot plate of 50×60 cm<sup>2</sup> made of carbon steel maintained at 220°C. The convective heat transfer coefficient is 25 W/m<sup>2</sup>K. What will be the heat loss from the plate?

(B) 2500W

(D) 4000 W

(A) 1500W

**Adda**247

- (C) 3000 W
- 24. Which property of mercury is the main reason for its use in barometers?
  - (A) high density (B) negligible capillary effect
    - (C) very low vapor pressure (D) low compressibility
- 25. The height to which a liquid will rise in an open capillary tube is *inversely* proportional to
  - (A) temperature of liquid(B) density of liquid(C) air pressure(D) surface tension

1/TR/SET/MECHANICAL/PRE/DEGREE/2023/D-225 (8)

- 26. What acceleration would cause the free surface of a liquid contained in an open tank moving in a horizontal track to dip by 45°?
  - (A) g/2
    (B) 2g
    (C) g
    (D) 3g/2
- 27. The piston rod of diameter 20 mm and length 700 mm in a hydraulic cylinder is subjected to a compressive force of 10 kN due to the internal pressure. The end conditions for the rod can be assumed as guided at the piston end and hinged at the other end. The Young's modulus is 200 GPa. The factor of safety for the piston rod is
  - (A) 6.32
    (B) 2.75
    (C) 0.68
    (D) 11.05
- 28. If the number of rivets are 3, diameter of rivets is 10 mm, thickness of the plate to be riveted is 5 mm, bearing strength of rivets is 150 MPa, Tensile strength of the plate is 200 MPa, Sheat strength of rivets is 100 MPa. If the rivets are to be designed to avoid crushing failure, the maximum permissible load P in kN is

**(B)** 

15

(D) 30.00

- (A) 7.50
- (C) 22.50

29. For a four-bar linkage in toggle position, the value of mechanical advantage is

(A) 0.0 (B) 0.5(C) 1.0 (D)  $\infty$ 

30. A line of 1 meter is shown by 1 cm on a scale. Its Representative Fraction (RF) is

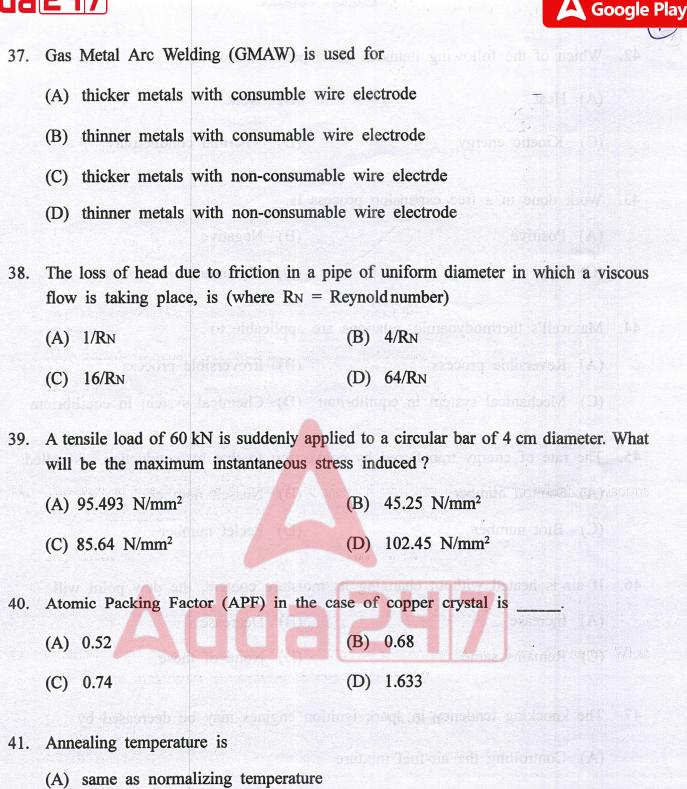

| (A) | 1 (B) 250 MPs | <b>(</b> B) | 100  |
|-----|---------------|-------------|------|
| (C) | 1/100         | (D)         | 1/50 |

- 48. In gear systems, speed reduction means torque any bounded to well tail and
  - (A) Stabilization (B) Increase (B) Increase
  - (C) Reduction (D) None of these

49. In the high gear in the transmission, main shaft turns at the same speed as the

GET IT ON Google Play

**menoquis** (

- (A) Idler shaft (B) Counter shaft
- (C) Clutch shaft (D) None of these
- 50. Queuing theory is applied best in situations where
  - (A) Arrival rate of customers equal to service rate
  - (B) Average service time is greater than average arrival time
  - (C) There is only one channel of arrival at random and the service time is constant
  - (D) The arrival and service rates cannot be analysed through any standard statistical distribution

51. Which is the equivalent value of 1 ton refrigeration in kJ/min? (A) 3000 (B) 12600

(C) 50

(D) 210

52. Water at 42°C is sprayed into a stream of air at atmospheric pressure, dry bulb temperature of 40°C and a wet bulb temperature of 20°C. The air leaving the spray humidifier is not saturated. Which of the following statements is true?

- (A) Air gets cooled and humidified (B) Air gets heated and humidified
- (C) Air gets heated and dehumidified (D) Air gets cooled and dehumidified

1/TR/SET/MECHANICAL/PRE/DEGREE/2023/D-225 (13) [Turn over

- 53. The first law of thermodynamics is a statement of
  - (A) Conservation of mass
- (B) Conservation of energy
- (C) Conservation of momentum
- (D) Conservation of angular momentum
- 54. In the steady state heat transfer problem, 'Steady' defines correctly by any one of the four options given below. Find the correct answer
  - (A) Temperature is constant with space
  - (B) Heat flow is constant with time
  - (C) Temperature varies with time
  - (D) Heat flow varies with space

55. Arc length in arc welding is generally kept approximately equal to

- (A) half the diameter of electrode
- (B) diameter of electrodes
- (C) two times the diameter of electrode
- (D) equal to minimum plate thickness
- 56. Example of four different types of fluids has been suggested in four different options given below. From these options, choose the correct example for the Pseudo plastic fluid.
  - (A) Tooth paste (B) Paint
  - (C) Gasoline (D) Butter
- 57. Soldering wire is essentially a
  - (A) lead tin (B) tin silver
  - (C) bismuth lead (D) nickel tin

1/TR/SET/MECHANICAL/PRE/DEGREE/2023/D-225 (14)

58. The ratio of the specific heats of a gas at constant pressure and at constant volume \_\_\_\_\_\_. (Choose the correct answer).

GET IT ON Google Play

- (A) varies with pressure (B) varies with temperature
- (C) is always a constant (D) None of these
- 59. Which of the following relationships is valid only for responsible processes undergone by a closed system of simple compressible substance? Neglect changes in kinetic and potential energy.
  - (A)  $\delta Q = dU + \delta W$ (B) T.  $dS = dU + \delta W$ (C) T. dS = dU + p.dV(D)  $\delta Q = dU + p.dV$
- 60. Consider the following two processes :
  (I) A heat source at 1200K, losses 2500 kJ of heat to the sink at 800K;
  (II) A heat source at 800K, losses 2000 kJ of heat to the sink at 500K.
  Which of the following is true ?
  - (A) Process I is more irrelevant than Process II
  - (B) Process II is more irrelevant than Process I
  - (C) Irreversibility associated in both the processes are equal
  - (D) None of these
- 61. Along the neutral axis of a simply supported beam \_\_\_\_\_. (Fill up the blank from options given below)
  - (A) Fibres do not undergo strain (B) Fibres undergo to minimum strain
  - (C) Fibres undergo to maximum (D) None of these
- 1/TR/SET/MECHANICAL/PRE/DEGREE/2023/D-225 (15) [Turn over

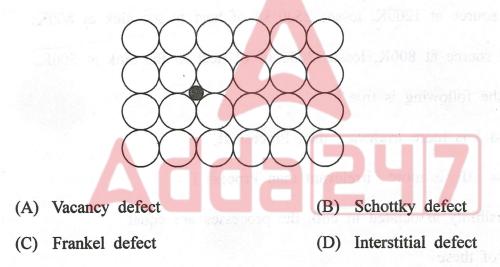

62. If the width of a simply supported beam carrying an isolated load at its centre is doubled, how the deflection of the beam at the centre will be changed?

- (A) 2 times (B) 4 times
- (C) 8 times (D)  $\frac{1}{2}$  times
- 63. We know that the section modulus of a rectangular section is proportional to a parameter. Name that parameter.
  - (A) Area of the section (B) Square of the area of the section
  - (C) Product of the area and depth (I
    - (D) Product of the area and width

64. Which defect does the following diagram represent?

- 65. The acute angle between the tangent to the helix and the axis of the cylinder on which teeth are cut, is known as \_\_\_\_\_\_. (Fill up the blank from the options given below)
  - (A) Lead angle

(B) Helix angle

(C) Arc of approach

(D) No such angle exists

1/TR/SET/MECHANICAL/PRE/DEGREE/2023/D-225 (16)

66. Match List 1 with List 2 and select the correct answer by using codes given below :

| 69.  | What kind of crystal structure Austen | ite have?        | Ē      |
|      | (A) bcc                               | (B) hcp          |        |
|      | (C) fcc                               | (D) Orthorhombic |        |

- 70. What is the shape of woodruff key?
  - (A) Cylinder (B) Semicircle
  - (C) Sphere (D) Trapezoid
- 71. For designing a plate clutch for uniform wear, what is the expression for the mean radius of friction surface (r)? Assume that the  $r_1$  and  $r_2$  are the external and internal radii of friction faces respectively.

(A) 
$$\mathbf{r} = \frac{2}{3} \left[ \frac{(\mathbf{r}_1)^3 - (\mathbf{r}_2)^3}{(\mathbf{r}_1)^2 - (\mathbf{r}_2)^2} \right]$$
 (B)  $\mathbf{r} = \frac{2}{3} \left[ \frac{(\mathbf{r}_1)^3 - (\mathbf{r}_2)^3}{(\mathbf{r}_1)^2 + (\mathbf{r}_2)^2} \right]$ 

- $(C) \quad r = \frac{r_1 r_2}{2}$
- 72. Assume that for a belt drive,  $F_1$  is the tension on the tight side of the belt in kg;  $F_2$  is the tension on the slack side of the belt in kg; F is the maximum tension to which the belt can be subjected to (in kg); and,  $F_c$  is the centrifugal tension in the belt in kg. Now, select the condition for the transmission of the maximum power by a belt.

 $(D) \quad r = \frac{r_1 + r_2}{2}$ 

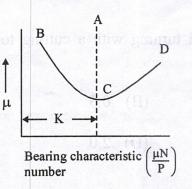

(A)  $F = F_c - (F_2 - F_1)$ (B)  $F = F_c + (F_2 - F_1)$ (C)  $F = \frac{(F2 - F_1)}{3F_c}$ (D)  $F = \frac{1}{3}F_c$

73. This is a graphical representation of relation between the absolute viscosity of lubricant in kg/m.s and the bearing characteristic number required for Journal bearing design. There are four points, viz, A, B, C, and D in this graph. Now, from the options given below select the term by which point 'C' is represented ?

- (A) Rating life
- (C) Specific dynamic capacity
- (B) Bearing modulus

99 units

(D) 117 units

- capacity (D) Rotation factor
- 74. Manufacturing a product requires processing on four machines A, B, C, and D in the order A-B-C-D. The capacities of four machines are A = 100, B = 110, C = 120 and D = 130 units per shift. If the expected output is 90% of the system capacity, then what is the expected output?

**(B)** 

- (A) 90 units
- (C) 108 units
- 75. Between which parameters, Break even analysis chart is drawn?
  - (A) Overhead cost and fixed cost (B) volume of production and income
  - (C) material cost and labour cost (D) None of these
- - (A) Minimum (B) Less than the cost or ordering
  - (C) Equal to the cost of ordering (D) Cost of over-stocking

## 1/TR/SET/MECHANICAL/PRE/DEGREE/2023/D-225 (19) [Turn over

77. In oxyacetylene welding, the tubes for acetylene are made of

- (A) copper (B) brass
- (C) steel (D) aluminium
- 78. Minimum shear strain in orthogonal turning with a cutting tool of zero rake angle is
  - (A) 0.0 (B) 0.5
  - (C) 1.0 (D) 2.0
- 79. In turning operation, the feed (f) could be doubled to increase the metal removal rate. To keep the same level of surface finish  $(h_f)$ , the nose radius (r) of the tool should be
  - (A) halved
  - (C) doubled

- (B) kept unchanged
- (D) made four times
- 80. In an assembly line for assembling toys, five workers are assigned tasks which take times of 10, 8, 6, 9 and 10 minutes respectively. The balance delay for the line is

**(B)** 

- (A) 43.5%
- (C) 14.0%

(D) 16.3%

14.8%

- 81. The coefficient of thermal expansion is defined as
  - (A) The change in volume per unit volume per degree Celsius
  - (B) The change in length per unit length per degree Celsius
  - (C) The change in pressure per unit pressure per degree Celsius
  - (D) The change in entropy per unit entropy per degree Celsius
