- (a) Will have been teaching
- (b) Will teaching
- (c) Will be teaching
- (d) Shall teach

Ans.(a)

#### Direction (12-16): Read the following passage carefully and choose the most appropriate answer to the question out of the four alternatives.

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though India has enough food to feed its masses two square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of good through a restructured, more efficient and decentralized public distribution system (PDS). Although the PDS is extensive it is one of the largest such systems in the world - it has not reached the rural poor and the remote places. It remains an

urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is larger than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. Also, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of rural population on the other, there is a strong case for making PDS target group oriented. By making PDS target group oriented, not only the poorest and the neediest would be reached without additional cost but we can also reduce the overall costs incurred.

**Q12.** Which of the following is true of public distribution system?

(a) It has reached the remotest corner of the country

(b) It has improved its effectiveness over the years(c) It is unique in the world because of its effectiveness.

(d) It has remained effective only in the cities. **Ans.(d)** 

**Q13.** What, according to the passage, would be the rationale of making the PDS target - group oriented?

(a) It will motivate the target-group population to work more

(b) It will abolish the imbalance of urban and rural sectors.

(c) It will remove poverty

(d) It will give food to the poorest section without additional cost.

## Ans.(d)

**Q14.** The full form of PDS is:

- (a) Public distribution system
- (b) Private distribution system
- (c) Partial distribution system
- (d) Party distribution system

Ans.(a)

<ul> <li>Q15.
