Comprehension:

Read the following passage and answer the questions given after it.

The US Fish and Wildlife Service (USFWS) reported on Thursday that Wisdom, the world's oldest surviving bird, has returned to its nest site in Midway Atoll National Wildlife Refuge. The wildlife authorities claimed on Twitter that the Laysan albatross is at least 71 years old. The enormous seabird, which was last seen on Thanks Giving, has repeatedly shown up at the same nesting location in the North Pacific for decades.

USFWS took to their Twitter handle and informed the bird's return with a tweet that read, "Wisdom, the world's oldest known wild bird, recently returned to Midway Atoll! The beloved Laysan albatross, or Moli, is at least 71 years old. Biologists first identified and banded Wisdom in 1956 after she laid an egg, and the large seabirds aren't known to breed before age 5."
