

NTA UGC NET Jan 2025

Application No	
Candidate Name	
Roll No.	
Test Date	09/01/2025
Test Time	9:00 AM - 12:00 PM
Subject	80 Geography

Section : General Paper

Comprehension:

The following table shows the percentage (%) distribution of both the number of employees and number of female employees working across six different cities (A-F), along with the percentage of male and female employees who are graduates among them. In all the six cities together, the total number of employees is 80000 and the ratio of male to female employees is 9:7. Based on the data in the table, answer the questions that follow:

City-wise Details of Employees				
City	Percentage Distribution of		Percentage of	
	Employees	Female Employees	Male Graduates	Female Graduates
A	24%	15%	26%	42%
B	15%	18%	33%	37%
C	20%	16%	41%	38%
D	6%	10%	36%	46%
E	9%	14%	47%	51%
F	26%	27%	48%	56%

SubQuestion No : 1

Q.1 What is the difference between the total number of graduate male employees and the total number of graduate female employees taking all the six cities together?

1. 701
2. 702
3. 703
4. 704

Options 1. 1

2. 2
3. 3
4. 4

Question Type : MCQ

Question ID : 3767495263

Option 1 ID : 37674920501

Option 2 ID : 37674920502

Option 3 ID : 37674920503

Option 4 ID : 37674920504

Status : Answered

Chosen Option : 4

Comprehension:

Read the passage carefully and answer the questions.

No two other poets can be more dissimilar. Ezekiel from India's sophisticated Western metropolis; Mahapatra is from an Eastern moffusil town. Ezekiel is a professor of English, with a literary background; Mahapatra is a trained physicist. Ezekiel is a Bene-Israel Jew; Mahapatra is a second-generation Christian. If Ezekiel pioneered post-independence Indian English poetry, Mahapatra gave it a new direction. Ezekiel's poetry is formally mindful; Mahapatra's poetry is written in free-flowing, sense-or idea-governed lines. The former wrote realistic verse; the latter's poetry is suffused with images and symbols. One can go on in this vein. No wonder, we notice Mahapatra inveighing against something in Ezekiel's poetic credo in his prose pieces. Up to the eighties Ezekiel was considered the foremost among Indian English poets but more recently he is being seen as highly inconsistent poet.

SubQuestion No : 46

Q.46 According to the passage, which of the following statements best describes Mahapatra's view of Ezekiel's poetic approach?

1. He is inspired by it
2. He is indifferent to it
3. He opposes it
4. He corroborates it

Options 1. 1

2. 2
3. 3
4. 4

Comprehension:

Increased rainfall over extended periods will mainly lead to river flooding, while short, intense cloudbursts can cause pluvial floods. Due to changing climate, many parts of the world are already facing more frequent severe and longer lasting droughts. Droughts often have knock – on effects, for example on agriculture, forestry, water resources and biodiversity. They reduce water levels in rivers and ground water, stunt tree and crop growth. Further human, animal and plant health are also threatened by climate change. While climate change may not introduce new health hazards, it will worsen and amplify existing one.

Comprehension:

The ancient classical period saw significant progress in academic fields across different areas of study. Ancient scholars like Plato, Aristotle, Thales, Anaximander, Ptolemy and Eratosthenes had such a huge impact on western thought that it was really hard to get beyond their ideas and theories for many centuries. The Journeys and discoveries made during this time resulted in a better understanding of the previously unknown world. The Greeks made significant contributions to the progress of human knowledge. They collected information from various ancient civilizations and expanded on it through theories and observations. Greek scholars thought about every possible topic. Their works really set the ground work for newly all the fields we study today. Their impressive contributions really helped establish geography as a solid discipline, especially in areas like mathematical, physical, historical and regional geography. It's hard to think about today's scientific advancements without considering the ground work laid by those ancient scholars.
