Context: Nuclear-powered INS Arihant carries out successful launch of SLBM

Significance:

It will help in a robust, survivable and assured retaliatory capability in keeping with India's policy to have '**Credible Minimum Deterrence**' that underpins its '**No First Use**' commitment."

- It increases the second-strike capability of India and thus boosts its nuclear deterrence.

India's nuclear-powered ballistic missile submarine (SSBN) programme is a closely guarded project. INS Arihant was the first boat under the SSBN project followed by another boat, INS Arighat. SSBN programme is a key element of India's nuclear deterrence capability.

- **INS Arihant, a 6,000-tonne submarine is the lead ship of India's Arihant class of nuclear-powered ballistic missile submarines built under the Advanced Technology Vessel (ATV) project.**

- **About:**

- **It completed India's nuclear triad (the capability to retaliate against a nuclear strike from land, air and sea).**

- **INS Arihant is propelled by an 83 MW pressurised light-water reactor at its core with enriched uranium fuel.**

K-4 (range 750km) and K-15 (3500 Km) have been designed to be operated from the Arihant class of submarines.

‘Ship Submersible Ballistic Nuclear Submarine’ (SSBN).

SSBN’s are those class of submarines which can go deep beneath the ocean making them virtually undetectable for months, they also carry nuclear-tipped ballistic missiles.

Context: Citing difficult to fulfil conditions set in the request for Proposal (RFP), previously Russia pulled out of the P-75I project (for the construction of 6 advanced submarines)

What is the P-75 Project?

- It is part of the Indian Navy's 30-year Plan for indigenous submarine construction- P-75 (1st Phase) and P-75I (2nd phase)
- P-75 (signed in 2005): to build 6 Scorpene class (diesel-electric) submarines (contract signed between India and France)

What is the P-75I project?

Project 75-I (approved in 2007) is 2nd phase of the Indian Navy's 30-year Plan for indigenous submarine construction.

It envisages the indigenous construction of 6 modern conventional submarines with:

- Non-nuclear or diesel-electric engine
- Contemporary equipment, weapons & sensors
- **Fuel-Cell based AIP** (Air Independent Propulsion)
- Advanced torpedoes and modern missiles

It is also the first programme to be progressed under the **Strategic Partnership** concept which offers a **level-playing field** to the private sector.

Why countries have Pulled out?

The conditions put in **Transfer of technology, stealth technology, construction in India as well as Air Independent Propulsion System** were very much advanced and **no prototype of it is available of it yet.**

- Previously, Sweden, France and Germany had also pulled out of the project.

1) **Solomon Islands** (South Pacific, has many WWII-era sites) temporarily halted all naval visits (previously it stopped UK and US Ships), raising concerns about China's growing influence in the region.

2) Fisherfolk and their families laying siege to the under-construction **Vizhinjam International Seaport**, over concerns that the port work has aggravated the coastal erosion along the coast of Thiruvananthapuram.

Context: A new species of crab, 'Dwivarna', (a new crab species) has been discovered in Uttara Kannada district and it is endemic to Yellapur.

Dwivarna, which is around 3 inches long and 2 inches wide, is not edible and thrives on moss and lichens.
