इंडोनेशिया द्वारा किस देश को G20 धर्म फोरम की अध्यक्षता सौंपी गई?

- (1) Pakistan
- (2) Afghanistan
- (3) America
- (4) India

India shares one of the highest zoonotic disease burdens along with Ethiopia Nigeria and Tanzania (as per the International Livestock Research Institute (ILRI).

Pigs and poultry have become mixing vessels for viruses from humans, livestock and wildlife and farmed animals simply act as bridging hosts, carrying the infection from wildlife to humans.

A UN report released just months after COVID-19 exploded into the world shows that in the last 170 years, nine epidemics among livestock have spilled over to people; six of them have emerged since the 1990s.

In India, out of the 13 livestock diseases being monitored, four are zoonotic. India has recently been ravaged by lumpy skin disease (not zoonotic).

Zoonotic diseases are those which pass from an animal or insect to a human e.g Anthrax, Rabies etc.
