Read the following passage and answer the next five questions by choosing the correct options

I first began traveling to India in the 1980s, drawn by a fascination with this ancient country that cherishes its history, has a deep reverence for learning, and harbors great ambitions for the future. My interest in India was professional as well as personal. Microsoft was expanding, our need for talent was growing, and as a CEO I was attracted to the vitality and ingenuity I saw in the Indian people. I was really pleased when we opened Microsoft's Indian headquarters in Hyderabad in 1990.

A few years later, several colleagues and I were flying into Bangalore. As we made our final approach, I looked out the window and saw an area of densely packed, tiny, dilapidated homes stretching out for miles. At that moment one of my Indian traveling companions declared proudly, "We have no slums in Bangalore".

Whether out of denial, embarrassment, or innocence, my colleague didn't see the "other" India. I don't mean to single him out. It can be easy to turn our eyes away from the poor. But if we do, we miss seeing a society's full potential.

I knew at the time that I was very fortunate to be collaborating with the most privileged people of India—highly educated citizens of great intelligence, diligence and imagination. But when Melinda and I started our foundation's work in India, we began to meet people from the areas we'd been flying over. They had little education and poor health, and lived in slums or poor rural areas—the kind of people many experts had told us were holding India back. Yet our experiences in India suggest the opposite: that what some call a weakness can instead be a source of great strength.

Our foundation began working in India a decade ago with a number of grants to fight HIV / AIDS at a time many feared India would become a flashpoint for the disease. In the ten years since, that most marginalized groups in Indian society have proved indispensable in the fight against AIDS.

In each case, Melinda and I have seen many examples of India's poor making dramatic contributions for the good of the country. Nowhere have we seen the power of the poor demonstrated more clearly however than in the fight to end polio. Indeed, India's accomplishment in eradicating polio is the most impressive global health success I've ever seen.

Experts predicted that polio would be eliminated in every other country before it was eliminated in India.

But India surprised them all: The country has now been polio-free for more than two years. As I see it, India's success offers a textbook script for winning some of the world's most difficult battles, not only in public health, but in most every area of human welfare, from business to agriculture to education. And the key has been the participation of the humblest, most vulnerable elements of the Indian population.

To be successful, any campaign this big has to include three elements: a clear goal, a comprehensive plan, and precise measurements—so you can see what is working and what is not and improve the plan as you go. India's polio program has benefited from all three. The goal is clear and ambitious: eliminate polio in India. The plan is massive and comprehensive, big enough to inspire the entire nation to action. The fact that India has fully funded its own anti-polio plan is a ringing statement of Indian commitment and self-confidence.

Above all, though, the campaign enlisted the support of the full sweep of Indian society, including health workers, ordinary citizens, and some of the poorest people in the most impoverished regions of the country. This program became their cause. It created a groundswell of enthusiasm and tapped the spirit of India.

The heart of the plan was a simple and inspiring mission: find the children.

The campaign showed India at its best-the relentless spirit, the idealism, the teamwork, the scientific power, the business acumen, the manufacturing skill, the political imagination, and the vast human resources that can deploy more than two million people ad spark the imagination of a billion. Yes, India faces challenges in many areas that are well documented in the media. But in its fight against polio, India has shown the world that when its people set an ambitious goal, mobilize the country, and measure the impact, India's promise is endless.

### Sub questions
