Relying on the testimony of a nine-year-old girl, a court in a city (S) of state awarded life imprisonment to her father, who is a doctor, for murdering his second wife with help of his two aides in 2021. The minor girl was witness to her mother's killing.

A person (X) had married Y (lady) in 2012. The couple had two daughters. On October 26, 2021, Y was found dead in their house and the doctor was missing. Y's mother was later told by the minor girl that her mother was killed by her father. The autopsy report corroborated her statement as it was established that Y was "strangled to death". Additional district government counsel (ADGC), Z (person) told TOI, "Y and X had a love marriage after the latter introduced himself as 'Dr. A'. The wedding was solemnised in another city as per Hindu rituals. Y came to know about her Husband's identity when they moved to a small town in S. 'A' was actually X and he was already married. The accused then started putting pressure on her to embrace his faith, to which she refused. Later she was found murdered".

The ADGC added, "An FIR was registered on the complaint of Y's mother on October 28, 2021." He was arrested three months later. During investigation, police found that he killed Y with the help of his brother-in-law B and aide C (hybrid name). Z said, "The nine year old daughter, who studies in class III told the court that her mother was watching TV when her father and two men killed her, Seeing the heinous nature of the crime, we argued for the death penalty."

Given below are two statements : One is labelled as Assertion (A) and the other is labelled as Reason (R) :

Assertion (A) : Black soil or Regur soil is also known as self-ploughing soil.

Reason (R) : Black soil is clayey in texture. It has the ability to retain a great amount of water. In summers, it develops cracks which expose it to water from rains and sunlight, thus making it easy to plough and to be used for the cultivation process.

In light of the above statements, choose the most appropriate answer from the options given below:

1. Both A and R are correct and R is the correct explanation of A

Assertion (A) : Black soil or Regur soil is also known as self-ploughing soil.

Reason (R) : Black soil is clayey in texture. It has the ability to retain a great amount of water. In summers, it develops cracks which expose it to water from rains and sunlight, thus making it easy to plough and to be used for the cultivation process.

In light of the above statements, choose the most appropriate answer from the options given below:

1. Both A and R are correct and R is the correct explanation of A
2. Both A and R are correct but R is NOT the correct explanation of A
3. A is correct but R is not correct
4. A is not correct but R is correct
