<b>SECTION B</b>		
<b>VERY SHORT ANSWER QUESTION (2×4=8)</b>		
21.	<p><b>Q: Study the map thoroughly and mention the languages that are dominantly present in Belgium.</b></p> <p><b>Ans: 59 per cent of people live in the Flemish region speak Dutch language. Another</b></p>	2

40 per cent people live in the Wallonia region and speak French. The remaining one per cent of the Belgians speak German. In the capital city Brussels, 80 per cent of people speak French while 20 per cent are Dutch-speaking.

Impact on Social life: The affluent and powerful French-speaking minority faced resentment from the Dutch-speaking community, which only later gained economic and educational advantages. This disparity sparked tensions between the two groups in the 1950s and 1960s, with the situation being particularly strained in Brussels. In the capital, the Dutch speakers, despite being a majority in the country, found themselves a minority, exacerbating the inter-community discord.

Impact on Political life - It had a negative impact as the majority was dominated by an elite minority French class which controlled all resources and money so they adopted a federal structure of social groups and created a community govt too to accommodate this difference.

The languages that are dominantly present in Belgium are Dutch and French.

For Visually impaired students in lieu of the above question.

**Q: Mention the languages that are dominantly present in Belgium;**

**Ans:** The languages that are dominantly present in Belgium are Dutch and French.

22. (A): “The most powerful weapon of the Spanish conqueror was not a conventional military weapon at all”. Justify the above statement by giving two reasons.

(A): **Ans:** The Spanish conqueror’s most powerful weapon was not a conventional military weapon because,

- they used germs like smallpox which spread deep into the continent before any European could reach there.
- America's original inhabitants had no immunity against these diseases that came from Europe. This disease erased the whole community, leading to conquest. This biological warfare in the mid sixteenth century made it easy for Spanish to overpower the Americans.

**(B): Mr Pawan, a village head wanted to create more job opportunities to increase the income of the people of his village under MNREGA act, suggest any three activities, so that Mr Pawan could initiate in his village.**

**(B): Ans:** Under the Mahatma Gandhi National Rural Employment Guarantee Act (MNREGA), the Village Head, Mr. Pawan, can take several initiatives to increase the income of the people living in his village. MNREGA aims to provide employment to rural households, and the following activities can be initiated to generate employment opportunities and increase income:

- **Cleaning the lake/pond:** Cleaning and maintaining water bodies such as lakes and ponds can help to improve the quality of water and make it suitable for irrigation purposes. This can lead to increased agricultural productivity, which, in turn, can increase the income of the farmers. Additionally, cleaning of the lake/pond can provide employment opportunities for the local people.
- **Village road construction:** The construction of village roads can improve connectivity and accessibility within the village, making it easier for people to commute to work or transport goods. This can help to increase economic activity in the village, creating more job opportunities and boosting the income of the local people.

**Co-operative milk society/small scale industry:** The formation of a co-operative milk society can provide a platform for the local dairy farmers to collectively sell their milk and other dairy products, increasing their income. Similarly, the establishment of a small-scale industry can generate employment opportunities and create a market for local products, which can further contribute to increasing the income of the people.

- **Construction work:** The construction of houses, community centers, and other infrastructure projects can generate employment opportunities for the local people, helping to boost their income. This can also improve the living standards of the villagers, making it a sustainable solution for poverty reduction.

**27. "Agriculture gives boost to the industrial sector". Justify the statement with any three relevant points.**

**3**

**Ans:** Agriculture gives boost to the industrial sector in the following way:

- **Raw Material Supply:** Agriculture is a significant source of raw materials for various industries, such as food processing, textiles, and paper. For instance, the cotton industry relies heavily on the production of cotton from agricultural fields. Similarly, food processing industries rely on agricultural products such as fruits, vegetables, and cereals. Thus, a healthy agricultural sector can ensure a steady supply of raw materials for industries, which, in turn, can boost their productivity and growth.
- **Market Expansion:** Agriculture provides a vast market for industrial products. For example, the use of agricultural machinery such as tractors, tillers, and harvesters creates a demand for industrial goods, including steel, plastics, and rubber. Moreover, the growth of the agricultural sector increases the purchasing power of

farmers, who become a significant consumer group for industrial products such as consumer goods, automobiles, and appliances.

- **Employment Generation:** Agriculture is a labor-intensive sector that generates employment opportunities for a significant population in India. A healthy agricultural sector can increase the income levels of farmers and agricultural workers, which, in turn, can create a demand for industrial products and services. Additionally, agriculture-related industries such as food processing and agrochemicals also create job opportunities, especially in rural areas. Thus, a robust agricultural sector can help to reduce unemployment and poverty, which are major challenges in India.

**The Indian constitution provides 3 lists to distribute the legislative power. State any two subjects that are included in the union list. In which list the subject "Education" is included and why?**

3

**Ans:**

1. The Indian Constitution has a three-fold distribution of legislative power, which contains three lists: The Union List, the State List, and the Concurrent List. The subjects that are included in the Union List are those that are under the exclusive jurisdiction of the Union Government. Some of the subjects that are included in the Union List are:

- Defense of the country
- Foreign affairs and relations
- Banking, currency, and coinage
- Railways and air transport
- Posts and telegraphs
- Census and statistics
- Copyrights, patents, and trademarks

2. The subject "Education" comes under the Concurrent List, which means that both the Union Government and the State Governments have the power to make laws on this subject. The Concurrent List contains subjects that are of common interest to both the Union and the State Governments.

**Compare Tables "A" & "B" and answer the question given below.**

3

**Table- A**

Share of Sectors in GDP in %			
Year	Tertiary	Secondary	Primary
1973-74	50	10	40
2013-14	68	21	11

**Table –B**

Share of sectors in employment in %			
Year	Tertiary	Secondary	Primary
1977-78	18	11	71
2017-18	31	25	44

A remarkable fact about India is that while there has been a change in the share of the three sectors in GDP, a similar shift has not taken place in employment. Why didn't a similar shift out of primary sector happen in case of employment? Substantiate your answer.

**Ans:** Substantial shift in employment in primary Sector hasn't happened because of the following reasons.

1. Insufficient job creation in the secondary and tertiary sectors: The primary reason for the limited shift in employment from the primary sector is the failure to generate an adequate number of jobs in the secondary (industrial) and tertiary (service) sectors. The growth of industrial output and service sector production has been significant, but the corresponding increase in employment opportunities has been comparatively lower.
2. Underemployment in the agricultural sector: The primary sector, particularly agriculture, suffers from underemployment, with more people engaged in farming than necessary. Even if a few individuals are moved out of agriculture, it does not significantly affect the production. This indicates that workers in the agricultural sector are not fully utilized, leading to a lower productivity level.
3. Share of Sectors in Employment though industrial output or the production of goods went up by more than nine times during the period, employment in the industry went up by around three times. The same applies to the tertiary sector as well. While production in the service sector rose by 14 times, employment in the service sector rose around five times. As a result, more than half of the workers in the country are working in the primary sector, mainly in agriculture, producing only about one sixth of the GDP. In contrast to this, the secondary and tertiary sectors produce the rest of the produce whereas they employ less about half the people

**Note:** The following question is for Visually Impaired Candidates only in lieu of Q. No 29

**Q. Tertiary sector activities help in the development of Primary and Secondary sectors. Substantiate your answer.**

**Ans-:**

- In any country, several services such as hospitals, educational institutions, post and telegraph services, police stations, courts, village administrative offices, municipal corporations, defense, transport, banks, and insurance companies, are required. These can be considered basic services.
- In a developing country, the government must take responsibility for the provision of these services.
- The development of agriculture and industry leads to the development of services such as transport, trade, and storage.
- The greater the development of the primary and secondary sectors, the more would be demand for such services.

**(B): “Non-conventional resources are the best option to conserve the natural resources” Substantiate this statement with Examples.**

**(B): Ans:** “Non-conventional resources are the best option to conserve the natural resources”

- Non-conventional sources are also known as renewable sources of energy. Examples of non-conventional sources of energy include solar energy, Bio energy, tidal energy, wind energy, Geo thermal energy, Natural gas etc.
- They are inexhaustible and renewable. They are also considered as cleansources of energy.
- Optimal use of resources of energy minimizes environmental impact and non-conventional resources produce minimum secondary waste compared to use conventional sources.
- The growing consumption of energy has resulted in the country becoming increasingly depend on fossil fuels such as coal, oil and gas. Rising prices of oil and gas and their potential shortages have raised uncertainties about the security of energy supply in future., which in turn has serious repercussions on the growth of the national economy.
- Natural gas is considered an environmentally friendly fuel because of low carbon dioxide emissions. It does not cause air pollution or environmental degradation. thus, it is the fuel for present century.
- Renewable energy resources technologies provide an excellent opportunity for mitigation of greenhouse gas emission and reducing global warming through substituting conventional energy sources.

**How would you evaluate Napoleon as an administrator who created a more rational and efficient system? Elucidate with suitable examples.**

5

**Ans:**

- The Civil Code of 1804 – usually known as the Napoleonic Code, secured the right to property, established equality before the law, and removed all privileges based on birth.
- The Napoleonic Code was followed by the regions under the French control.
- New businessmen, artisans, peasants, and workers enjoyed a new-found freedom.
- In territories under French control such as Italy, Germany, Switzerland, and Dutch Republic, peasants were freed from manorial dues, peasants were freed from serfdom, feudal system was abolished, administrative divisions were simplified.
- Guild restrictions were removed in towns.
- There were improvements in communication and transport systems.
- To facilitate the movement and exchange of goods and capital from one region to another, small-scale producers of goods and businessmen began to realise that common national currency, standardised measures and weights, and uniform laws were of great help.

**Q. Analyze the decisions taken by the conservatives at the Congress of Vienna in the year 1815.**

**Ans:** The representatives of the four great European powers – Britain, Russia, Prussia and Austria who had collectively defeated Napoleon, met at Vienna to draw up a settlement for Europe. The Congress was hosted by the Austrian Chancellor Duke Metternich. The result was the Treaty of Vienna of 1815.

- Its object was to undo the changes that had come about in Europe during the Napoleonic wars and to restore the monarchies that had been overthrown by Napoleon, and create a new conservative order in Europe.
- The bourbon dynasty, (deposed during the French Revolution) was restored to power.
- France lost the territories it had annexed under Napoleon.
- A series of states were set up on the boundaries of France to prevent it from expansion in the future. E.g., kingdom of the Netherlands, which included Belgium, was set up in the north.
- Genoa was added to Piedmont in the south. Prussia was given territories on its western frontiers. Austria was given control of northern Italy.
- The German confederation of 39 states set up by Napoleon was left untouched. In the east, Russia was given part of Poland while Prussia was given a portion of Saxony.

Thus, conservative regimes set up in 1815 were autocratic. They did not tolerate criticism and dissent. They curbed activities that questioned the legitimacy of

33.	<p><b>A farmer has borrowed money from a money lender at a high rate of interest, as he could not pay the interest, he was forced to borrow from another landlord to settle the amount for the interest borrowed to the money lender. State the consequences he may face in this situation.</b></p>	5

**Ans:** The Farmer has fallen into “Debt trap”, He is in a situation where he will not be able to repay the debt incurred because:

The Informal sector was the source of credit opted by the farmer, where

- the Rate of interest is high,
- no proper documentation is sought,
- no set of rules and regulations will be followed,
- the lenders were often punished and will be ill-treated,
- the prime motive of the informal sources of this kind of credit is to make profit.

**He may face the following Consequences:**

- The farmer may face ongoing harassment and physical harm from the men sent by the money lender.
- He will not be able to make regular interest payments or repay the full amount borrowed. This could lead to significant stress and anxiety, as well as potential physical injuries.
- Borrowing from another landlord to repay the original loan may create a cycle of debt for the farmer particularly if the interest rates on the second loan are also high.

The farmer may experience personal consequences, such as mental stress, anxiety, and depression due to the constant pressure of repayments and harassment from the lenders.

<b>35</b>	<p>Maharashtra is a state located in western India, with a population of over 110 million people. The state is home to several large cities, including Mumbai, and has a significant agricultural sector. However, the state is facing a severe water crisis, with its water resources coming under increasing pressure due to climate change, industrialization, and urbanization. The main challenges faced by water resource management in Maharashtra are:</p> <ol style="list-style-type: none"><li>I. Overexploitation of groundwater: Maharashtra is one of the most groundwater-stressed states in India, with the demand for water exceeding the supply. Overexploitation of groundwater for agriculture and urban use has led to a decline in water levels, which has severe implications for the sustainability of water resources.</li><li>II. Pollution of surface water: Industrialization and urbanization have led to the pollution of surface water bodies such as rivers and lakes. The pollution has led to water quality degradation, which poses risks to human health and the environment.</li><li>III. Inefficient irrigation practices: The agricultural sector is the largest user of water</li></ol>	

	<p>in Maharashtra, accounting for around 80% of total water use. However, traditional irrigation practices such as flood irrigation are inefficient and lead to the wastage of water.</p> <p><b>1. 36	<p><b>Read the source given below and answer the questions that follow:</b></p> <p>For comparing countries, their income is considered to be one of the most important attributes. Countries with higher income are more developed than others with less income. This is based on the understanding that more income means more of all things that human beings need. Whatever people like, and should have, they will be able to get with greater income. So, greater income itself is considered to be one important goal. Now, what is the income of a country? Intuitively, the income of the country is the income of all the residents of the country. This gives us the total income of the country. However, for comparison between countries, total income is not such an useful measure. Since, countries have different populations, comparing total income will not tell us what an average person is likely to earn. Are people in one country better off than others in a different country? Hence, we compare the average income which is the total income of the country divided by its total population. The average income is also called per capita income. In World Development Reports, brought out by the World Bank, this criterion is used in classifying countries. Countries with per capita income of US\$ 49,300 per annum and above in 2019, are called high income or rich countries and those with per capita income of US\$ 2500 or less are called low-income countries. The rich countries, excluding countries of Middle East and certain other small countries are generally called developed</p>	

countries.

**1. Explain the significance of per capita Income.**

**Ans:** The Per capita income enables comparisons between countries and provides insights into the relative economic performance and living standards across different nations.

Per capita income also serves as an important indicator of the standard of living in a country.

**2. What are the classifications of countries based on per capita income, and which entity is responsible for determining these classifications?"**

**Ans:** The countries are classified into "High income or Rich countries and low income countries based on their per capita Income. If it is US \$ 49,300 per annum they will be classified as rich country and if the per capita income is US\$ 2500 per annum it will be called a poor country. World Bank determines this classification.
