Note:

- The cutoffs are stated region-wise as per criteria laid out in <https://olympiads.hbcse.tifr.res.in/wp-content/uploads/2024/08/RMO-2024.pdf> where region codes are available in <https://www.mtai.org.in/rmo-region-codes/>.
- Cutoffs differ by class, and for students in classes 8,9,10,11 a lower cutoff for girls is applicable as listed.
- To find out your region you should look at the first two digits immediately following the two alphabets in your roll number.
- Eg.
 - For roll number AR18-999999, the relevant region code is 18.
 - For roll number AS18-999999, the relevant region code is 18.
 - For roll number AS30-999999, the relevant region code is 30.

*Each region code has different cutoff which are computed independently, except for region code 32 (OCI students), which is included in region code 01 for the computation as declared earlier in the eligibility criteria. **Note that this is relevant only for OCI students who do not have school system in India. For OCI students who study in the Indian School System, the cutoffs from the corresponding region to the school will be applied.**
