Amazon, without giving details about the nature or scope, admitted to a data breach that exposed the user names and email ids of some of its users. While the company did not disclose the total number of users that had been affected by the breach, it sent out an email to all the affected users informing only them about the technical error. And now, the e-commerce giant is reportedly offering gift cards as a compensation to its data breach victims. This Seattle headquartered e-commerce company offered gift cards between \$5 to \$100 to some of the users who have been affected by the breach.

Many affected users filed a complaint with the service desk after the breach. Many people who claim to have been affected by the breach complained to the company, however none of them have received a response from the company so far. It is **cooked up** that Amazon customer service supervisors have been directed not to comment or offer any sort of compensation to the affected Amazon users.

Directions : Read the passage carefully and answer the questions that follow.

The animals that live in a specific region are what we call the wildlife of the region. Just as vegetation is the flora, wildlife is the fauna of a region. It includes all the animals, birds, insects etc. of the region.

The diversity of wildlife in the world is unimaginably large. There are said to be about 1 to 2 million species of animals on the planet! And India in particular **boasts** of an incredible wildlife presence. Our national animal, the tiger is one such rare animal found in India. In fact, the Bengal tiger can be found nowhere else on earth. We also have the Asiatic Lion, the only species of lions found outside Africa.

To preserve these amazing animals and their natural habitats, we have many conservatories, national parks and wildlife sanctuaries. In recent times to bring down illegal hunting and poaching the Indian government has passed some very strict laws as well.
