Q.9 A question is given, followed by two statements labelled I and II. Identify which of the statements is/are sufficient to answer the question.

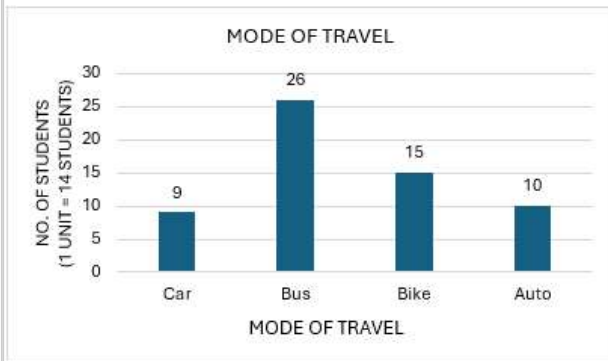

Question:
A theatre is showing a movie N. How many tickets were sold in a particular show of that movie?

Statements:
I: The cost of each ticket for movie N is ₹250.
II: The theatre collected a revenue of ₹50,000 for that particular show of movie N.

- Ans**
- A. Both Statements I and II together (and not Statement 1 alone or Statement 2 alone) are sufficient to answer the question.
 - B. Data in Statement I alone is sufficient to answer the question, while data in Statement II is not.
 - C. Both Statements I and II together are not sufficient to answer the question.
 - D. Data in Statement II alone is sufficient to answer the question, while data in Statement I is not.

Q.12 A question is followed by two statements numbered (I) and (II). You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and select the most appropriate answer.

Question: What is the selling price of a product after discount?

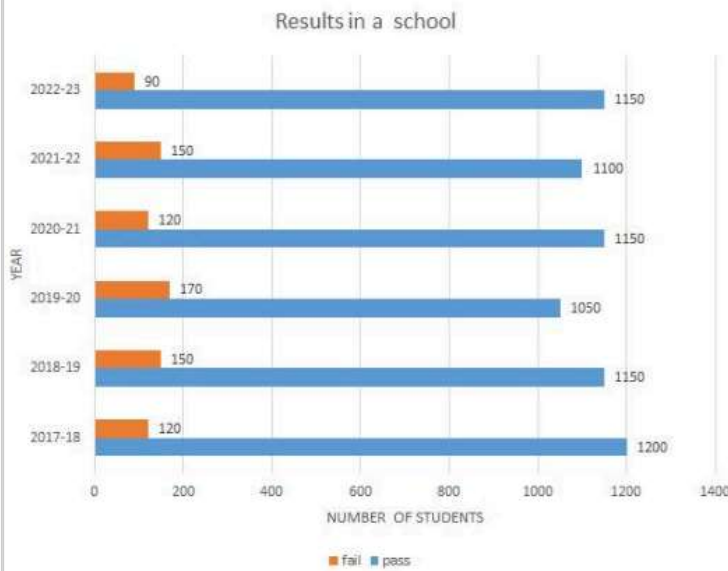

Statements:

- (I) The product's marked price is \$200, and the discount offered is 10%.
- (II) The selling price of the product is 90% of the marked price.

- Ans
- A. Data in Statement I alone is sufficient to answer the question, while data in Statement II is not.
 - B. Both Statements I and II together are not sufficient to answer the question.
 - C. Both Statements I and II together (and not Statement I alone or Statement II alone) are sufficient to answer the question.
 - D. Data in Statement II alone is sufficient to answer the question, while data in Statement I is not.
