<p>Army gets vertical wind tunnel to train special forces</p> 	<p>Context</p> <ul style="list-style-type: none"> The Army has installed its first vertical wind tunnel (VWT) at the Special Forces Training School (SFTS) at Bakloh in Himachal Pradesh. This is done to augment the training infrastructure of special forces and combat free-fallers. <p>Key points</p> <ul style="list-style-type: none"> The state-of-the-art wind tunnel is set to refine the combat free fall (CFF) skills of armed forces personnel Functioning as a freefall simulator, the VWT creates a column of air at specific velocities, orchestrating different CFF conditions. The system offers a controlled environment, enabling trainees to enhance their skills by simulating real-life freefall conditions.
<p>India-Canada Relations facts</p> 	<ul style="list-style-type: none"> According to the Census of Canada 2021, Canada is home to over 1.86 million people of Indian origin, i.e., about 5% of the country's 36.99 million population, and 5.8% of the 32 million strong global Indian diaspora. According to Immigration, Refugees and Citizenship Canada (IRCC) data, 225,940 or over 40% of 549,260 total study permits to international students were issued to Indians in 2022. In 2022, India was Canada's 10th largest bilateral trading partner (exceeding \$13.7 billion). Canada was India's ninth largest partner, with exports up to \$5.3 billion. Similarly, visitors from India comprised Canada's fourth largest international air travel market. Many of these traders and investors are members of the Indian diaspora in Canada. In 2021, Canadians visiting India spent \$93 million, and tourists from India exceeding 89,500, the highest from any single country, spent \$3.4 billion in Canada.

Daily Current Affairs Encyclopedia

Himalayan region

- A study published in **Nature** indicates that **90 million people across 30 countries live in 1,089 basins** containing glacial lakes.
- Of these, **one-sixth** live within 50 km of a glacial lake and 1 km of potential GLOF runout channels.

Issues

- The Himalayan Region is susceptible to a range of hydro-meteorological, tectonic, climate and human-induced mountain hazards.
- The enormity of the challenge is seen in the **National Remote Sensing Centre's (NRSC) Glacial Lake Atlas of 2023**.
- Three major river basins, of the Indus, Ganga, and Brahmaputra, are host to 28,000 glacial lakes greater than 0.25 hectares in area, in five countries.
- Of these, 27% are in India, in six States and Union Territories.

Multi-disciplinary effort for Mitigation

- **NRSC's atlases** have provided high-resolution data via remote sensing, which allows for monitoring spatial change.
- The **Central Water Commission** is conducting hydro-dynamic assessments of high-risk lakes, mapping water flow, height and routing simulations using digital elevation models.
- The **NDMA's national guidelines (2020)** provide States with a technical overview of the hazard and risk-zonation and suggest strategies for monitoring, risk-reduction and mitigation.

Unhealthy urban India

Context

- India's urban population is estimated to reach **675 million in 2035**, the second highest in the world.
- Although there is widespread recognition that cities have been fuelling India's rapid rise to economic superpower status, almost all are failing their inhabitants in terms of delivering on health, environmental and equity targets.

Issues

- India's urban inhabitants experience:-
 - **multi-scalar health risks** including the world's highest levels of air and noise pollution, limited greenery,
 - **lack of access to sidewalks and**
