	<p>and the nervous system.</p> <ul style="list-style-type: none"> Steps were taken to identify pig farms near the epicentre of the outbreak and put them under surveillance for symptoms.
<p>India's goods exports shrink for the seventh successive month</p> <p>Concept: Trade Deficit</p>	<p>In news:</p> <ul style="list-style-type: none"> India's goods exports and also services exports are shrinking, while its imports have increased. When a country imports more goods than what it exports, it would have a "deficit" on its trade account. In other words, more money is going out of the country than coming in via the trade of physical goods. Hence, India's current account deficit is likely to widen. <p>What is Trade Deficit?</p> <ul style="list-style-type: none"> Simply put, trade deficit or negative balance of trade (BOT) is the gap between exports and imports. When money spent on imports exceeds that spent on exports in a country, trade deficit occurs.
<p>India is at a pivotal moment in its health-care journey</p>	<p>Context India's non-communicable diseases (NCD) burden will be nearly \$4 trillion by 2030.</p> <p>Key points/data</p> <ul style="list-style-type: none"> Infant mortality has improved by four times, maternal mortality has improved by seven times and the average life expectancy of an Indian is up nearly 30% from 55 years to over 70 now. Today, India has world-class health-care infrastructure along with incredible clinical talent that delivers the best in class clinical outcomes at incredible scale and at a fraction of the global price. India's expertise in highly specialised areas such as organ transplants, cardiology, oncology and more has made the country a fast-growing destination for medical value travel (MVT), not just for the price but also for the speed of access and the sheer quality of care. AI expenditure in India is expected to reach \$11.78 billion by 2025. It is expected to add \$1 trillion to India's economy by 2035.
<p>Cheetah project on the right path of success: govt. Report</p> 	<p>Context A government report was released on the completion of one year of the programme. It says that the project is on the right path to becoming a successful large carnivore conservation, translocation, and population-establishment endeavour. Four of the six criteria established for assessing the short-term success of India's cheetah reintroduction programme have already been met</p> <p>Key points</p> <ul style="list-style-type: none"> The Cheetah Action Plan, published last year, lists six short-term success criteria: survival of 50% of the introduced cheetahs for the first year; establishment of home ranges in the Kuno National Park; successful cheetah reproduction in the wild; survival of wild-born cheetah cubs past one year; successful first-generation breeding; and cheetah-based revenues contributing to community

	<p>livelihoods.</p> <ul style="list-style-type: none"> The report noted that the project achieved 50% survival; establishment of home ranges; birth of cubs; and direct revenue contributions to local communities through the engagement of cheetah trackers and indirect appreciation of land value in surrounding areas.
<p>Kuno cheetahs to be released into the wild in winter with collars on</p>	<p>Context The cheetahs in Kuno are likely to be released into the wild after the onset of winter, and they will have their collars fitted back on them</p> <p>Key points Kuno Palpur National Park:</p> <ul style="list-style-type: none"> Kuno National Park lies in Sheopur district of Madhya Pradesh in Central India near the Vindhyan Hills. With an area of 748 sq. km, the park is located within the larger Kuno Wildlife Division. Initially established as a wildlife sanctuary, it was only in 2018 that the government changed its status into a national park. Named after the Kuno River (One of the main tributaries of the Chambal River) that cuts across it, Kuno is primarily a grassland region. Flora and Fauna: The protected area of the forest is home to the jungle cat, Indian leopard, sloth bear, Indian wolf, striped hyena, golden jackal, Bengal fox and dhole, along with more than 120 bird species Kuno National Park was selected under 'Action Plan for Introduction of Cheetah in India'.
