State of Global Climate Report 2023 Context: The World Meteorological Organisation (WMO) Adda 247 published the new annual State of the Climate report on Tuesday (March 19), revealing that 2023 broke records as the hottest year on record. Key points: Greenhouse Gases (GHGs): GHGs like carbon dioxide, methane, and • nitrous oxide are responsible for trapping solar radiation in the atmosphere, leading to global warming. Concentrations of these gases reached record highs in 2022, the latest year with values consolidated global (1984–2022), according to the WMO report. Surface Temperature: The global average near-surface temperature in • 2023 soared to 1.45 degrees Celsius above pre-industrial levels, the highest on record. The primary reason for this increase is the rising concentrations of GHGs, although the onset of El Niño in 2023 also played a role in boosting temperatures. Ocean Heat Content (OHC): Oceans have absorbed nearly 90% of the extra heat trapped by GHGs since 1971, leading to a steady increase in their temperature. In 2023, the OHC reached its highest level in the 65-year observational record. Marine Heat Waves (MHWs): Global oceans experienced an average daily marine heatwave coverage of 32% in 2023, well above the previous record of 23% in 2016. MHWs occur when a region of the sea's surface temperature rises to 3 or 4 degrees Celsius above the average for at least five days. Antarctic Sea-Ice Extent: Antarctic sea-ice extent hit a record low of 1.79 million km2 in February 2023, the lowest since satellite records began in 1979.

	• The extent remained at a record low from June to early November, with the annual maximum in September reaching 16.96 million km2, approximately 1.5 million km2 below the 1991–2020 average.
	 Glacier Retreat: The hydrological year 2022-2023 witnessed the largest loss of ice on record for the global set of reference glaciers, especially in North America and Europe. The annual mass balance of the reference glaciers dropped to a new low in 2022-2023, reaching -1.2 m w.e., which represents the amount of mass gained or lost by the glacier expressed in metres of water equivalent.
Nana Jagannath Shankarseth	Context:
	 Recently, the Maharashtra cabinet made a significant decision regarding Mumbai Central station. They decided to request the Ministry of Railways to rename Mumbai Central station after Nana Jagannath Shankarseth. About: Born on February 10, 1803, in a wealthy
	 Brahmin family in Murbad, Thane district. He took over the family business at a young age after his father's demise in 1822. Inspired by Sir Jamsetjee Jeejeebhoy, he
	became a renowned social reformer,
	 educationist, and philanthropist. Often described as the "architect" of Mumbai
Auroacie-	(Bombay), he made significant contributions to various sectors, laying a strong foundation for
	 the city. He earned the goodwill of both Indians and the British and became the first Indian to be nominated to the Legislative Council of Bombay.
	Shankarseth's Contributions
	 He founded the Native School of Bombay, later renamed as the Bombay Native Institution and then the Board of Education, which evolved into Elphinstone College.
	 Shankarseth, along with Sir Jamsetjee Jeejeebhoy, was part of the committee that gave impetus to the first train project in India,

	which ran between Boribunder and Thane on April 16, 1853, undertaken by the Great Indian Peninsular Railway Company.
 Kisan Credit Card (KCC) Fisheries scheme Kisan Credit Card (KCC) Scheme The Kisan Credit Card (KCC) scheme was introduced in 1998 for issue of Kisan Credit Cards to farmers on the basis of their holdings for uniform adoption by the banks so that farmers may use them to readily purchase agriculture inputs such as seeds, fertilizers, pesticides etc. and draw cash for their production needs. 	 Context: The Kisan Credit Card (KCC) Fisheries scheme has been integrated into the JanSamarth Portal by the Department of Fisheries. This integration aims to enhance credit accessibility for fishers, fish farmers, and stakeholders nationwide. JanSamarth Portal: JanSamarth Portal: JanSamarth is an innovative online platform that facilitates direct interactions between lenders and beneficiaries. It enables citizens to access loans under specific Central government schemes. In 2018-19, the Kisan Credit Card (KCC) facility was extended to fishers and fish farmers to meet their working capital requirements. The scheme covers various farmer categories, including individuals, joint borrowers, Joint Liability Groups, and Self Help Groups. It offers an annual interest subvention of 3% for timely repayment.
Gender Pay Gap Report	 Context: The World Bank's recent report highlights a persistent global issue: women continue to earn significantly less than men. The gap is often cited as 77 cents for every dollar earned by men, known as the "gender pay gap." Key points: Definition: The International Labour Organization (ILO) defines the gender pay gap as the difference between the average wage levels of all working women and men. Focus: The metric focuses on overall wage differences, not on comparing the pay of men and women in identical roles.

Battle of Okinawa

Context:

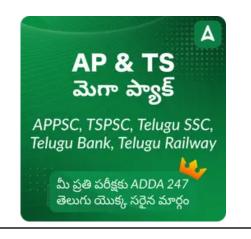

The FBI(Federal Bureau of Investigation) • returned 22 looted artefacts to Japan after a Massachusetts family discovered them while going through their late World War II veteran father's belongings.

Key points:

- The artefacts, missing for nearly 80 years, date • back to the 18th and 19th centuries.
- They include six portraits, a hand-drawn 19th-century map of Okinawa, and various pottery and ceramics, representing a significant piece of Okinawan history.

About:

- The Battle of Okinawa, which took place from • April 1 to June 22, 1945, stands as the Pacific Theater's most extensive amphibious assault of World War II.
- This significant event signaled the start of the Japanese Empire's decline and played a pivotal role in paving the way for the Allied triumph in the war.
